WORK EXPERIENCE

WhatsLoan Fintech Pvt. Ltd.

Software Engineering Trainee

Associate Software Engineer

Bengaluru

January 2025 - June 2025

July 2025 - October 2025

- Working as a full stack developer using MongoDB, ExpressJS, AngularJS, NodeJS for development(MEAN).
- Developed scalable **MEAN stack applications** with configurable, reusable components to accelerate future development and reduce debugging time.
- Implemented **network-level and database-level encryption** using cryptographic methods to ensure compliance with PII and data security standards.
- Actively gathered requirements directly from clients and integrated core services into live projects based on their needs.

Pageloop Pvt. Ltd.

Junior Software Developer

Bengaluru

October 2025 - Present

~ Full-stack + AI agent developer using PydanticAI to build and scale agentic workflows.

PROJECTS

Github Link: <https://github.com/manurathansetty>

Wildlife Animal Intrusion Detection System | Programming Languages: MakeSense.ai, Google Collab

- Built an AI-powered system using image processing and sensor-based triggers to detect animal intrusions in protected zones. Real-time alerts via buzzer and messaging app improved response efficiency.

Food Ordering Application | Android Studio | Programming Language: Java

- Developed an intuitive Android application with interactive cuisine displays, cart management, and seamless order summarization for enhanced user engagement.
